DETAILED ACTION

1. This Office Action is in response to the amendment filed January 23, 2006.

Election/Restrictions

2. Newly submitted claims 21-31 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 21-31 are directed to the embodiment in Figure 7 while claims 13 and 14 are directed to the embodiment in Figure 12.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 21-31 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Objections

3. Claims 11 and 13 are objected to because of the following informalities:
 - a. in claim 11, line 2, "corrector" should be "converter" (see claim 13, line 5);
and
 - b. in claim 13, line 12, "the distortion converter" should be "the linear compensator" in order to be consistent with Figure 12 and lines 5-11.Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 10-12, 15 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification, as originally filed, does not describe the distortion converter comprised of a filter (see claim 13, lines 13-14) ***in combination with*** the calculator as recited in claim 10 or the signal processor as recited in claim 11. Claim 13 corresponds to the embodiment shown in Figure 12 and the detailed description of Figure 12 does not describe the distortion converter with a filter ***and*** a calculator (see claim 10) or a signal processor (see claim 11). Therefore, the subject matter in claims 10 and 11 was not described in the specification as originally filed and fails to comply with the written description requirement.
6. As dependent claims of claim 11, claims 12, 15 and 16 are rejected for the same reason.

Allowable Subject Matter

7. Claims 13 and 14 are allowable.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
